Notice

CAUTION – Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

This laser product is certified as a CLASS 2 laser product to the requirements of the US Federal Laser Product Performance Standard (FLPPS) contained in the regulations in 21 CFR Subchapter J. Class 2 laser products can be hazardous when directly viewed.

Avoid direct viewing of Class 2 laser energy. For reference the FLPPS requirements for demonstration laser products like laser pointers are limited to Class 2 levels of laser energy. This product uses diffractive optics to scatter the beam energy. This scattering effect causes the energy concentration to drop below the exposure limits for momentary or accidental viewing at a relatively short distance from the laser aperture. As similar with all bright light sources, when you operate this device in unsupervised general public areas, it is recommended that up close access to the BlissLight be restricted or prevented.

This laser display device incorporates a Class 2 laser system which, by itself, may be hazardous. However, this laser display device incorporates a protective housing and diffractive holographic optics in the machine design such that there is no exposure or human access to laser radiation during operation or maintenance above the Class 2 limits. Each individual laser beam power is under 1mw which is less than a standard laser pointer.

UNDER NO CIRCUMSTANCE shall attempts be made to open the protective housing or operate the device if the aperture windows are damaged.

All service to this laser display device requiring the protective housing to be opened and/ or removed shall be performed by BlissLight service personnel or their authorized agents. Opening the BlissLight protective housing voids the warranty.

NO LASERS SHOULD BE POINTED INTO THE SKY WITH 10 NAUTICAL MILES OF AN AIRPORT. IF YOU ARE LOCATED WITHIN THIS ESPECIFIC PERIMETER WE RECOMMEND THE LASERS BE POINTED DOWN AT THE GROUND SO NO STRAY BEAMS ARE PROJECTED INTO THE AIR.

CHECK WITH YOUR LOCAL AIRPORT OR COUNTY GUIDELINES FOR FURTHER INFORMATION.

Thank you for purchasing the BlissLights Spright Move. The BlissLights Spright Move is a unique light fixture that uses new laser and holographic technology to project thousands of moving pin-points of light to create a "firefly" effect without the need for wind. We hope you enjoy this incredibly unique lighting experience.

Each unit provides over 900 square feet of coverage which replaces 6 standard landscape lighting fixtures or hundreds of feet of rope lighting. With an average electrical usage of just 8 Watts in temperatures above 55F, and 17 Watts in temperatures below 55F, it is perfect for year-round use.

Before you Begin

Immediately upon receiving the fixture: carefully unpack the carton packaging; check the contents to ensure that all parts are present and are in good condition. Notify the shipper immediately and retain packing material for inspection if any parts appear damaged from shipping or the carton itself shows signs of mishandling. Save the carton and all packing materials. In the event that the fixture must be returned to the factory, it is important that the fixture be returned in the original factory box. Please see parts list below for box contents.

Parts List:

(1) BlissLights Spright Move

(1) Transformer

(1) Stake

Setting up the BlissLights Spright Move

Before operating your Spright Move , please read the “Before you Begin” section and “Notice” section of this user guide.

STEP 1: First locate the 2-prong plug connected to the cable exiting the BlissLights Spright Move head. Plug this end into the matching hole on the end of the 12V Manufacture provided transformer. Screw the cap on to complete the water tight seal. Next plug the standard 3-prong plug on the other end of the transformer into an outdoor/Indoor outlet.

STEP 2: Stake the BlissLights Spright Move into the desired location. Do not use fixture head to stake light into the ground, grasp by stake only.

Operating the BlissLights Spright

The BlissLights Spright Move operates in temperatures of -15o F to 90o F. There may be a slight delay if operating in temperatures below 55 o F. Please allow up to 10 minutes for light to warm up and reach its full projection.

Installation Tips

- For scheduled or nighttime-only operation, use with a timer. **Do not connect the light to a dimmer pack, it will damage the light. Use with manufacture provided transformer only.**
- The darker the area the light is being used in, the brighter the projection. Try to stay away from areas with street lights or other bright lights.
- If you are going to hang the BlissLights Spright Move, it is recommended that, for safety purposes, your lights are properly mounted using a suitable hanging clip and safety cable.
- The BlissLights Spright Move will cover an area of about 30' X 30' for every 10 feet away from surface (equivalent to the size of about 2 two-car garages).
- For more tips and suggestions on how to use and position your BlissLights, please visit www.blisslights.com

Product Specifications

	BlissLights Spright Move
Laser Classification	Class 2
Maximum Laser Power (Single Beam)	Less than 1 mw
Laser Wavelength	532nm Green - 455nm Blue
Laser Optics	Single source holographic optical element
Power Consumption	Up to 17 Watts
Power Input	110/120V (when used with manufacturer provided transformer)
Operation	Indoor / Outdoor
Operating Temperature	-15° F to 90° F
Projection Coverage	30ft. X 30ft.
Maintenance	Maintenance Free
Dimensions	14"H x 5.62"L x 4"W
Warranty	Limited 1 Year

LIMITED WARRANTY

The manufacturer warrants this product to be free from defects in materials and workmanship for a period of one (1) year from date of purchase. This warranty applies only to the original consumer purchaser and only to products used in normal use and service. If this product is found to be defective, the manufacturer's only obligation, and your exclusive remedy, is the repair or replacement of the product at the manufacturer's discretion, provided that the product has not been damaged through misuse, abuse, accident, modifications, alterations, neglect or mishandling. This warranty shall not apply to any product that is found to have been improperly installed, set-up, or used in any way not in accordance with the instructions supplied with the product. This warranty shall not apply to a failure of the product as a result of an accident, misuse, abuse, negligence, alteration, or faulty installation, or any other failure not relating to faulty material or workmanship. This warranty shall not apply to the finish on any portion of the product, such as surface and/or weathering, as this is considered normal wear and tear. The manufacturer does not warrant and specially disclaims any warranty, whether expressed or implied, of fitness for a particular purpose, other than the warranty contained herein. The manufacturer specifically disclaims any liability and shall not be liable for any consequential or incidental loss of damage, including any labor/expense costs involved in the replacement or repair of said product. Please contact BlissLights at warranty@blisslights.com, or (626) 709- 3319.

Owner Registration Card

Please fill out, cut along dashed line, affix proper postage and return this Owner registration card within 10 days to insure that your new BlissLights is covered by the limited warranty. You can also go to www.blisslights.com and fill out your registration card online.
